**NOTIFICATION FOR THE READER:**

**Pictures of the guests with children were not permitted to protect the children. amid the covid-19 pandemic. Hospital provided pictures showed below:**

**Miss Egypt 2020 candidates** were able to visit Mansoura University Children Hospital-located in the Governorate of Mansoura, Egypt about 4.5 hours by car from Alexandria residency of Dr. Resk. It is a local hospital-based Non-Profit thus, donations can be made. The Hospital is a State of the Art Medical Facility. that provides quality medical services to *neonatal children* until 18 years old with zero expenses. They aim at upgrading the scientific research in the field of pediatric with different specialties. They have many medical units in the hospital, such as Cardiology, Gastroenterology, and Marrow transplant. Every female contestant donated along with the miss Egypt organization. This incognito hospital is located in the Governorate of Mansoura. Few people have ever heard about it; however, it is one of Egypt's most outstanding hospitals. This hospital showcases all the modern facilities and services that can help the children to recovery. It contains 12 different departments and approximately **200 Medical staff** and around **400 children**. A detailed explanation regarding each

department was given during the visit. I was fortunate to have a chance to see the various cases of children. They demonstrated concrete examples in videos of children while they are being treated. It was followed by a detailed presentation about the role of hospital staff. They explained their function, and it was clear how they are dedicated and working so hard for those children. They like what they are doing. Overall, the visit was very informative and enjoyable. We came to know regarding the role of doctors in the overall health management of the hospital. We saw how much care they provide for the children, the different departments that deal with specific treatment and illness, and the modern equipment.
